

**LISTING OF CLAIMS**

The following claims shall replace the currently pending claims.

1. – 9. (Currently cancelled)

10. (Currently Amended) A method for inducing a therapeutic immune response in a patient who has already previously experienced an allergic response, comprising delivering one or more smooth, spherical, colloidal particles comprising calcium phosphate, a surface modifying agent ~~having an allergen~~ at least partially coating the particle, and an allergen at least partially coating the surface modifying agent or impregnating the particles or both, to the patient in need thereof.

11. (Original) The method of claim 10, wherein the particle is delivered subcutaneously, through inhalation, or across a mucosal surface.

12. (Previously Presented) The method of claim 10, wherein the particle is complexed with a pharmaceutically acceptable excipient and delivered as a spray, an aerosol, an ointment, an eye drop, a gel, a suspension, a capsule, a suppository, an impregnated tampon, a buccal, sublingual, or oral formula, or combinations thereof.

13. – 26. (Currently cancelled)
